FULL-STACK WEB DEVELOPER · CUSTOM BUSINESS APPLICATIONS

rajeshskkanagaraj2001@gmail.com

Full-Stack Web Developer focused on practical, database-driven web applications for businesses. Builds responsive React interfaces, Node.js/Express APIs, authentication flows, management dashboards and business workflows. Portfolio projects include a clinic billing system, a restaurant digital signage platform, and a staff checklist application. Focused on turning clear business requirements into reliable, usable applications.

CORE SERVICES

Custom Full-Stack Apps	React Web Applications	Admin Dashboards	Billing & Invoice Systems
REST API Development	Database Integration	Authentication & RBAC	Responsive UI
